ISSUED: 13 JULY, 2010  
FOR IMMEDIATE RELEASE

## P A Safety Management Limited achieves ISO 27001 certification

**P A Safety Management Limited** is proud to announce that it has attained certification to **ISO/IEC 27001:2005**, the internationally recognised standard for the management of information security. This was achieved through the development of an Information Security Management System (ISMS), which ensures that the company's sensitive information remains secure and that adequate and proportionate security controls are in place.

Following a set of stringent and rigorous audits, P A Safety Management Limited was formally certificated by UKAS-accredited SGS United Kingdom Ltd, one of the world's leading certification bodies. The United Kingdom Accreditation Service (UKAS) is the sole national accreditation body recognised by the government to assess, against internationally agreed standards, organisations that provide certification services.

This major achievement follows the company's recent success in certification to ISO 9001:2008, ISO 14001:2004 and BS OHSAS 18001:2007, making it one of the few SMEs in the UK to conform to all four standards. Managing Director **Paulo Anaia** states, "These accreditations are testament to the strength of our working practices as well as a reflection of our ongoing commitment to integrity and reliability. In particular, ISO 27001 certification demonstrates that we take our responsibilities for securing information seriously and that the records of our clients and business partners are protected at all times."
