

PRESS RELEASE

26 APRIL, 2010
FOR IMMEDIATE RELEASE

P A Safety Management Limited awarded ISO 9001, ISO 14001 and BS OHSAS 18001 certification

P A Safety Management Limited has achieved triple success by attaining certification to **ISO 9001:2008**, **ISO 14001:2004** and **BS OHSAS 18001:2007** through the development of a robust Combined Management System.

Following a set of stringent and rigorous audits, P A Safety Management Limited was formally certificated by UKAS-accredited SGS United Kingdom Ltd, one of the world's leading certification bodies. The United Kingdom Accreditation Service (UKAS) is the sole national accreditation body recognised by the government to assess, against internationally agreed standards, organisations that provide certification services.

Conforming to all three standards means that P A Safety Management Limited has established a positive and systematic approach to maintaining consistently high levels of quality, environmental and health and safety management. This triple certification is a significant milestone in the company's commitment to ongoing improvement in these areas. Managing Director **Paulo Anaia** states, "It's a win-win situation. Our clients have the added reassurance of these certifications, which in turn help the company further 'raise the bar' on providing practical advice, support and training on all health and safety issues and fulfilling the responsibilities of the CDM Co-ordinator under CDM2007."

ISO 9001 is the internationally recognised standard for quality management systems. P A Safety Management Limited has demonstrated its ability to consistently provide products and services that meet client requirements. The company aims to enhance customer satisfaction through the effective application of its quality management system. It has established processes for the continual improvement of its system whilst conforming to customer and applicable statutory and regulatory requirements.

ISO 14001 is the international environmental standard which provides a framework for the implementation, monitoring and improvement of an environmental management system. P A Safety Management Limited has demonstrated conformity with this standard by having in place procedures to identify, plan for action and monitor its environmental commitments.

BS OHSAS 18001 is the internationally recognised standard for occupational safety and health (OH&S). It was a logical progression for P A Safety Management Limited to formally demonstrate its commitment to health and safety by fulfilling the requirements of an OH&S management system, which enables the company to consistently identify and control its health and safety risks, aid legislative compliance and improve overall performance.
